RETURN OF THE ST. John's CADETS.—The ender corps of St. John's Academy, Major Patter commanding, returned from Lionard tawn, on the steamer T. V. Arrowsmith, last evening, reaching their barracks a little after nice o'clock. They were met at the wharf by a great crowd of friends and relations, and were received at the barracks with a banfire, jayous healing of the bell, &c., by such of their comandes as had remained at school.

The cadets report that they had, emphatically, a good time the best of all their many excursions. Every night, except Sunday and Wednesday, there was a ball, and the houses of the citzens were thrown open to them with that old fashioned hospitality which, though rapidly dying out elsewhere, still continues in all its ancient glers, emeng the people of Southern Maryland. The young ladies, especially, were so attentive, that is said, have organized a scelety, the mem-

the young men of the town grewiselous and, it bers of which are pledged to visit no young lady for thirty days, in publishment of their neglect of them, during the cidets' stay. Wreaths and buttons were in demand, and more than one cap and coat will need repair in consequence, and as to hearts, it is said that quite a number have been left behind.

The boys return, as usual, in excellent health and without accident. Yesterday, being the Fenst of Corpus Christi, the Catholic cadets, wearing side arms, marched, under the command of Licuis, Mergan and Seawell, from the court house to the Church of St. Aloysius, where the front paws were assigned them. After the services, which were impressive, the master, Rev. Father Gaffrey, advanced to the shane if rail and addressed them specially. He exhorted them to be Unristian soldiers, to put on the arms of justice, and endeavor to conquer in the great battle with the enemy of souls. They were most y from Virginia, a State renowned for the wisdom and courage of her people, and he hoped they would amulate the examile of their countrymen, Washington, and Lee and Jackou, love peace and strive to keep it, but be ever ready, when their country should need their services to repel invasion, to defend her. In concurson, he bade them forewell, hoping to them spais next year, and invoked upon them the plessing of God, who, he trusted, would give them a safe and happy return to their school and to their homes.

A large portion of the citizens accompanied the corps to the wharf, and as the little steamer Mystic, which conveyed the cidets to Blackistin's Island moved off cheer after cheer was exchanged between the next and the wharf, and handketchiefs flattered until the bend is he by hid the steamer from view. Half an mus or so was spent at Blackiston's Island and he trip up the river was truly delightfat. lany excursionists from Washington were on board, and were entertained by music on the nione by Cornical Dodd and Cadens Frederick Schuler and John W. Avery. A large cake, won by the Principal at the Catholic Church leastival to Lonerdtown, on funday might, was handed round to the old its after dinner.

The drift and discipline of the eader corps frew forth many encomiums in Leonard own. and will probably lead to considerable acressions to the Academy from Sr. Mary's county.

A better and more hopeful feeing pravails in all classes of the business community, and eve rybody seems impressed with the idea that a brighter day has dawned upon our city. There is no longer doubt of the establishment here of Silver Lace Pine, Earrings, Chatethe "boom" is having its beneficial off, etc. The fical year about closing will show the city to be in a healthy and ratisfactory financial condition, and with the continued commonical administration of its affairs must further improve. Financially there is a continued quiet. There is no pressing demand for money, and losts on good collaterals are ossily placed. In Baltimore the money market is easy. The supply of funds is ample, and loans are readily obtained on best collateral at 4.5 per cent. Prime mercantile paper passes at 5.6 per cent, and a desirable amount of best known names would probably go at even a lower figure. The New York mency market is without perceptible change. There were free offerings yesterday of capital at 3 per

cent on stocks, and at 2 121 per cent on govern ment bonds. U.S. bonds are a shade stronger for the 5 per cents, and a fraction easier for the 4 per cents. The 21 per cents closed yesterday 107141034 for the extended 6s class, and 10.5 1023 for the extended 51. State bonds are quiet but firm. UARU -It should be generally known that are persons to unfortunate as to lose one or more of their teath need not wait weeks and months for articicial substitutes and endure inconvenience, dis verseable changes in voice, fa-cial expression, vc., but may have artificial teeth made before and inserted immediately after extraction of their natural teeth. By this node a better adaptation, a more pleasant expression and a nearer approach toward preserv-ing the natural harmony of the features are seured, and very much of the pain and difficulty experienced in learning to upo teeth are also avoided. I have practiced this mode successfully for seven years, and having introduced it here, would be glad to refer any one interested to pa-dents who know of it from experience. In , reating the natural teeth my object is to preserve very one that time, patience and modern methods of treatment can sava. The use of arsenic in destroying exposed nerves is condemned by the more salightened of the dental profession on account of its turning teeth dark, inducing ab-access and finally the loss of the teeth. The nerve pair, which is the source of life to the tooth. should always be treated, whon exposed, with view to its restoration to health.
